

Hidden or Collapsed Menu (Only Announcements Visible)

Blackboard now allows you to hide and collapse your course menu to provide more viewing area. However, this may then make it seem that all you can view is the Announcements area within a course. Below are two different views, simply click where indicated in order to restore your course menu.

Hidden Course Menu

Collapsed Course Menu

*If neither of these options helps, you may have inadvertently clicked on a link in the **My Announcements** module rather than entering the course through the link in the **My Courses** module.*
