

Limiting an Exam to a Specific Student for a Make-Up Exam

Part I – Limit the exam to a specific time frame for a specific student.

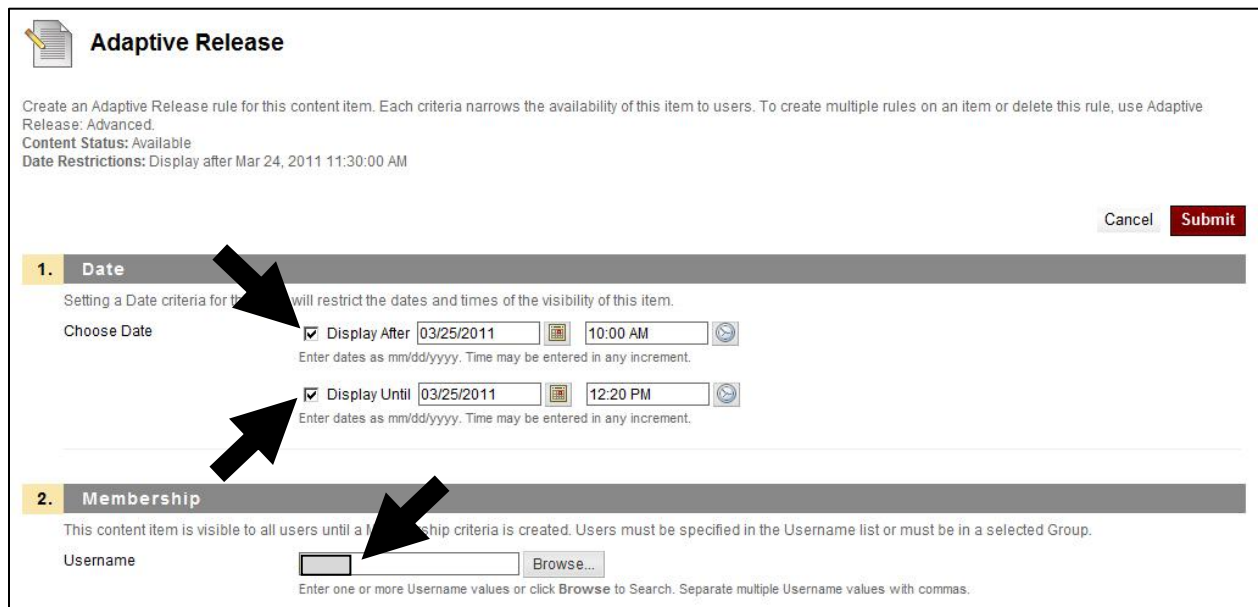

From the contextual menu, select **Adaptive Release**.

Select **Display After** and **Display Until** options and enter the date and time (e.g. 3/25/2011 10:00 AM and 3/25/2011 12:20 PM).

Enter the student's NetID in the **Username** field or use the Browse option to search and select. If you have a group of students, simply separate their NetIDs with commas.

Click **Submit**.

A screenshot of the 'Adaptive Release' configuration page. At the top, it says 'Create an Adaptive Release rule for this content item. Each criteria narrows the availability of this item to users. To create multiple rules on an item or delete this rule, use Adaptive Release: Advanced.' Below this, it shows 'Content Status: Available' and 'Date Restrictions: Display after Mar 24, 2011 11:30:00 AM'. There are 'Cancel' and 'Submit' buttons. The page is divided into two sections: '1. Date' and '2. Membership'. In the 'Date' section, there are two rows of criteria. The first row has 'Display After' checked, with a date field containing '03/25/2011' and a time field containing '10:00 AM'. The second row has 'Display Until' checked, with a date field containing '03/25/2011' and a time field containing '12:20 PM'. In the 'Membership' section, there is a 'Username' field with a 'Browse...' button next to it. Three black arrows point to the 'Display After' and 'Display Until' rows and the 'Browse...' button.
