

## Remove an Area from the Course Menu

Each course is provided with a default course menu which can then be customized by the instructor. If you do not use Blackboard for Assignments, you may want to remove this area from your course. *Please note, removing a content area from the course menu removes the content in that area completely and cannot be undone. You may prefer to “hide” the menu instead.*

- Change **Edit Mode** to **On** if it is not already by clicking on the option at the top right of the window.

- Click on the **Contextual Menu** (double arrow) to the right of the menu and select **Delete**.

- Click **OK** on the confirmation window. *Please note, removing a content area from the course menu removes the content in that area completely and cannot be undone. You may prefer to “hide” the menu instead.*
