

Show a Hidden Area from the Course Menu

As an instructor, you have the ability to customize your menu including hiding certain areas from students. For example, if you are using Units in your course menu you may only want your students to access the current units. When you are ready to open a unit, you can simple unhide the menu area.

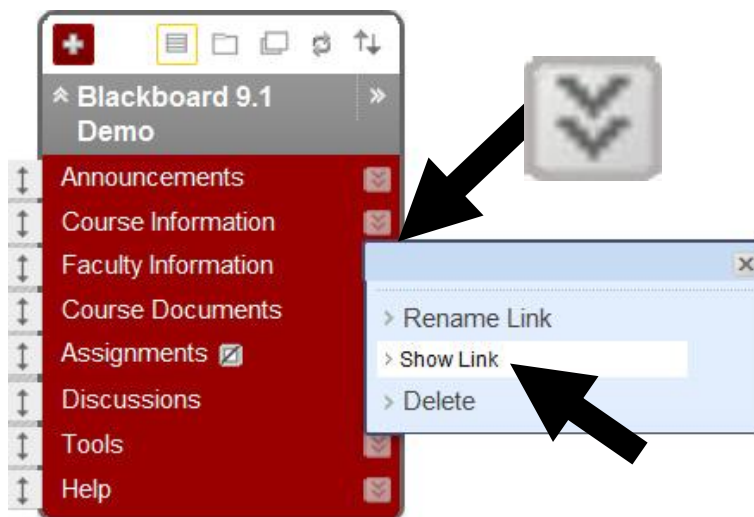

If an area is hidden from the student, it is noted with an icon (square with a slash through it) to the right of the menu. The empty square indicates that there is no content in the menu area.

- Change **Edit Mode** to **On** if it is not already by clicking on the option at the top right of the window.

- Click on the **Contextual Menu** (double arrow) to the right of the menu and select **Show Link**.

- The window will refresh and icon indicating a hidden menu (square with a slash through it) will no longer be displayed.
